Anchors of Hope

Young Leadership Board

BEING AN ANCHOR OF HOPE

Anchors of Hope Young Leadership Board is a group of emerging 20/30's leaders that are interested in expanding on the mission of Esperança through their professional and personal network while improving health and providing hope for the poorest communities of the world. Anchors of Hope will enhance the visibility of Esperança's domestic and global work through a variety of fundraising opportunities, professional and personal networking, and volunteerism.

Anchors of Hope serve a one-year term and commit to volunteering a minimum of ten-hours annually to support their community and Esperança. There are no annual dues, but Anchors of Hope are highly encouraged and supported to connect with Esperança staff, the Board of Directors and community members to move the pendulum to bring awareness of medical and public health issues.

Anchors of Hope never have to start a sentence with, "I should've..."

WHO IS ESPERANCA?

Esperança is a 501(c)3 organization that has been improving health and providing hope for families in the poorest communities of the world through sustainable disease prevention, education and treatment for nearly 50 years.

Esperança envisions a world where communities across the globe, have the tools, training and support to achieve optimal health through access to: clean water, safe housing, nutritious food and disease prevention and treatment.

In 1970 Esperança, which means "Hope" in Portuguese, was founded to support the medical missionary work of Father Tupper to serve the world's poorest citizens in the rain forests along the Amazon River. For nearly 50 years Esperança has evolved to provide community health and development projects in 14 countries around the globe and is currently active in Bolivia, Mexico, Mozambique, Nicaragua, Peru and Phoenix, U.S.A. Each year, approximately 175,000 individuals are impacted through the tireless work of Esperança by supporting: volunteer surgical missions; clean water and sanitation; health education and disease prevention; nutrition and food security; and ecological housing.
